

Next Steps

Your comments and feedback will be collated and carefully considered. Where possible the development will be adjusted to reflect the results of the consultation and if this is not possible we will explain why.

The results of this pre application consultation, the planning application and the supporting technical documents will be submitted in April 2009 to North Somerset Council. This will be subject to the usual planning application consultation procedures as set down by North Somerset Council.

We will continue to work with the community throughout the coming months. The flow diagram opposite illustrates how this process is working.

Your feedback is important

We would like to know what you think about the proposed development. Please take time to consider what it means for you and your particular issues.

Let us know how the airport currently affects you, what are your concerns and what suggestions for improvement could you offer?

Fill in a feedback form, and send it in to us – we look forward to hearing your views.
